

RAHUL R

Web Development | Data Analyst | Data Visualization | Machine Learning

Palakkad, Kerala, India | +91 9400123084 | rahulr.offic@gmail.com | linkedin.com/in/rahul3339 | github.com/RAHULR3331 | rahulr3331.github.io

PROFESSIONAL SUMMARY

Data-driven Computer Science graduate (MSc, Data Analytics) with hands-on experience in Python, SQL, and MySQL for data analysis, exploratory data analysis (EDA), and predictive modelling. Skilled in building dashboards and reports using Power BI and Excel, with a strong foundation in machine learning (CNN-based image classification with TensorFlow/Keras) and a background in full-stack web development using Laravel and RESTful APIs. Adept at cleaning, analysing, and visualizing data to uncover actionable insights, with a strong problem-solving mindset and passion for data-driven decision-making.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C

Data Analysis & Machine Learning: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Predictive Modeling, Machine Learning, CNN-based Modelling (VGG16, ResNet50), Pandas, NumPy, TensorFlow, Keras

Visualization & Reporting: Power BI, Matplotlib, MS Excel, Dashboard Development, Reporting, Data Visualization

Databases: MySQL, Database Design, RESTful APIs, Data Modelling

Web Development: Laravel (PHP), HTML, CSS, Bootstrap, JavaScript

Developer Tools: Jupyter Notebook, Git, Version Control

Soft Skills: Problem Solving, Analytical Thinking, Collaboration, Communication

PROFESSIONAL EXPERIENCE

Trainee Software Developer

October 2025 – June 2026

Texila Educare Healthcare and Technology Enterprises Pvt. Ltd.

- Developed and maintained Laravel (PHP)-based web applications for three business units — Texila Educare, GDTS, and EKAA — supporting their core operational workflows.
- Designed backend modules, RESTful APIs, and MySQL database architecture to support scalable, multi-tenant application functionality.
- Built dynamic, responsive user interfaces and integrated frontend components with backend services for a seamless user experience.
- Implemented authentication and role-based access control (RBAC) to strengthen application security and protect sensitive data.
- Optimized SQL queries and refined database structure, improving application performance and reducing query response times.

Junior Software Developer

March 2025 – October 2025

Meta Soft

- Contributed to industry-specific software solutions using Laravel (PHP), improving operational efficiency through business process automation.
- Built and maintained a GST Billing System with integrated stock management, streamlining sales processing and inventory tracking for business clients.
- Designed backend logic, RESTful functionalities, and MySQL database schemas to support core billing and inventory operations.
- Developed responsive, user-friendly interfaces using HTML, CSS, Bootstrap, and JavaScript.

PROJECTS

Indian Dance Forms Recognition (Deep Learning)

Python, TensorFlow, Keras, Pandas, NumPy, CNN (VGG16, ResNet50)

- Built a computer vision model to classify three Indian classical dance forms (Bharatanatyam, Kuchipudi, Mohiniyattam) from images using CNN architectures.
- Performed dataset collection, preprocessing, and data augmentation using Python to improve model generalization and reduce overfitting.
- Applied transfer learning techniques with VGG16 and ResNet50 to build an end-to-end image classification pipeline.

Cirrhosis (Liver Disease) EDA & Prediction

Python, Pandas, NumPy, Matplotlib

- Conducted exploratory data analysis and predictive modeling on a clinical dataset of 418 patient records across 20 features, including demographics, clinical status, and biochemical indicators.
- Cleaned and preprocessed raw healthcare data using Python to prepare it for statistical analysis and machine learning modeling.
- Built and evaluated predictive models to identify patterns associated with liver disease progression.
- Visualized key trends and feature relationships using Matplotlib and Seaborn to support data-driven insights.

Chapter One (Laravel Bookstore Application)

Laravel (PHP), MySQL, HTML, CSS, Bootstrap

- Developed a full-stack bookstore web application using Laravel, implementing CRUD operations for efficient product and category management.
- Built user authentication and role-based access, enabling administrators to manage listings while customers register, log in, and place orders.
- Designed a MySQL-backed database architecture to support order handling and inventory management.

EDUCATION

MSc Computer Science (Data Analytics)

Rajagiri College of Social Sciences, Kochi

76.75%
2023 – 2025

BSc Computer Science and Applications

Sri Krishna Arts and Science College, Coimbatore

75.9%
2019 – 2022

Higher Secondary

Government Vocational Higher Secondary School, Agali

74.16%
2017 – 2019

High School (SSLC)

Government Vocational Higher Secondary School, Agali

94.44%
2016 – 2017

CERTIFICATIONS

- Java SE 8 Programming — Oracle
- Oracle Database: Introduction to SQL — Oracle
- Enhancing Soft Skills and Personality — NPTEL (Swayam)
- Artificial Intelligence Concepts — IBM
- Spoken Tutorial Training on C Programming — IIT Bombay
